

What This Guide Covers

This guide walks you through connecting your TacticalPay-provided Authorize.net payment gateway to your GunBroker account so you can accept credit and debit cards in the GunBroker checkout for your firearms sales.

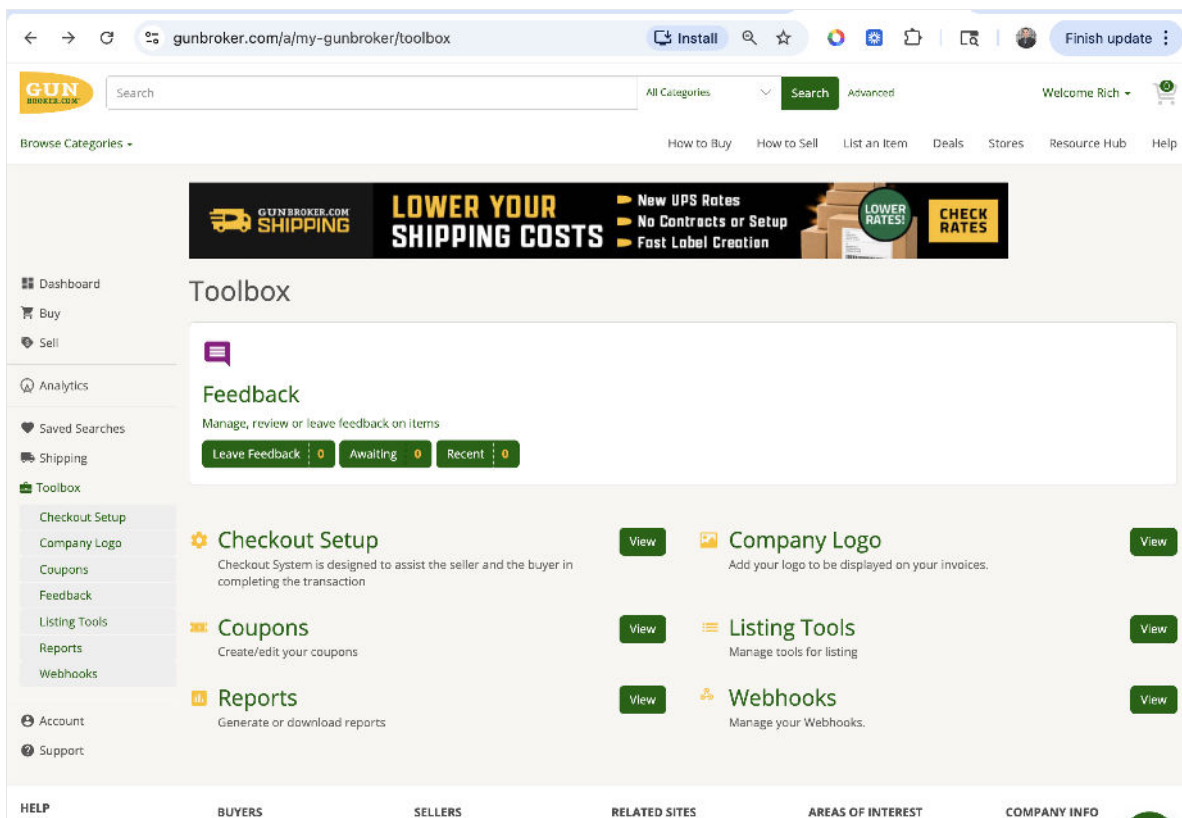

You'll need:

- An active GunBroker account
- An Authorize.net gateway provisioned through your TacticalPay merchant account
- The **API Login ID** and **Transaction Key** from your TacticalPay welcome email

Note: Don't have an Authorize.net gateway yet? If you're an existing TacticalPay customer, contact support@tacticalpay.com to add one. If you're new to TacticalPay, complete the online application at tacticalpay.com to get started.

Step 1 — Log In and Open Checkout Setup

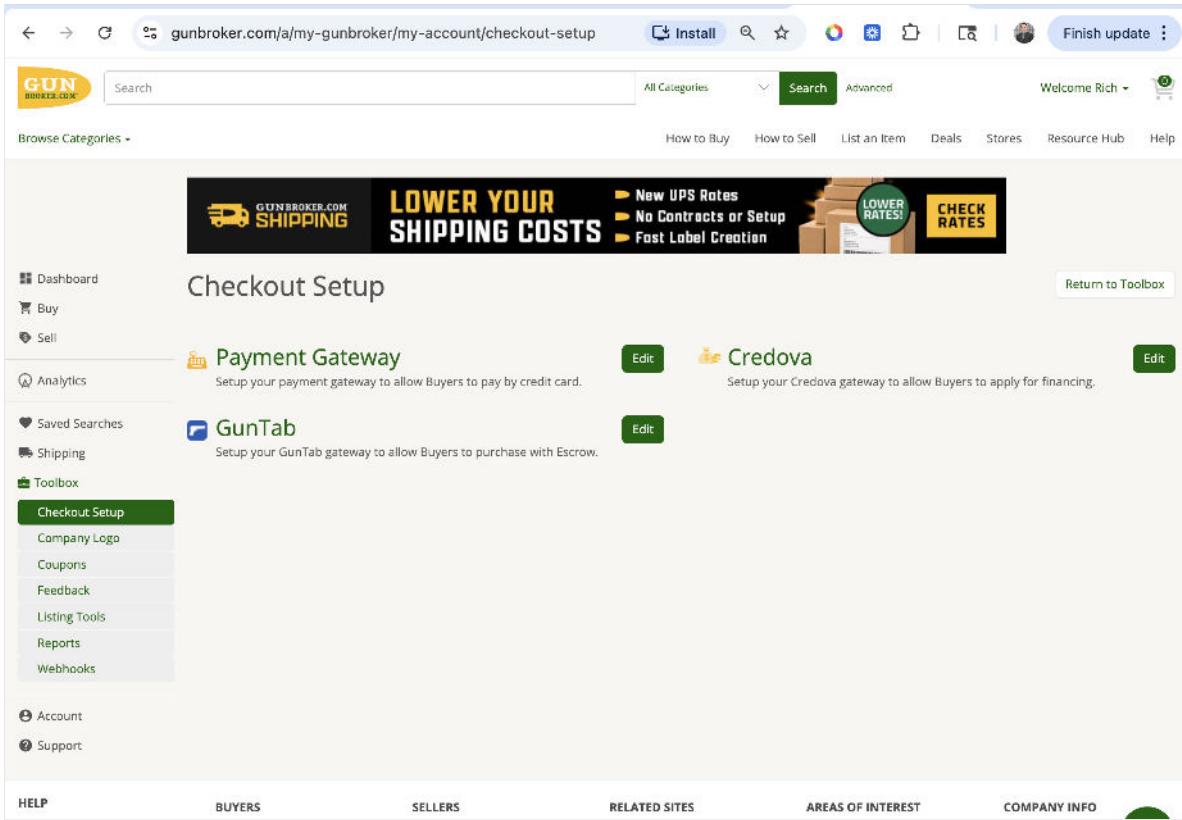

Log in to your GunBroker account, then open the **Toolbox** menu in the left sidebar and click **Checkout Setup**.

*GunBroker Toolbox — click **Checkout Setup** in the left sidebar*

Step 2 — Edit the Payment Gateway

On the Checkout Setup page, find the **Payment Gateway** tile and click **Edit**.

Checkout Setup — click **Edit** next to **Payment Gateway**

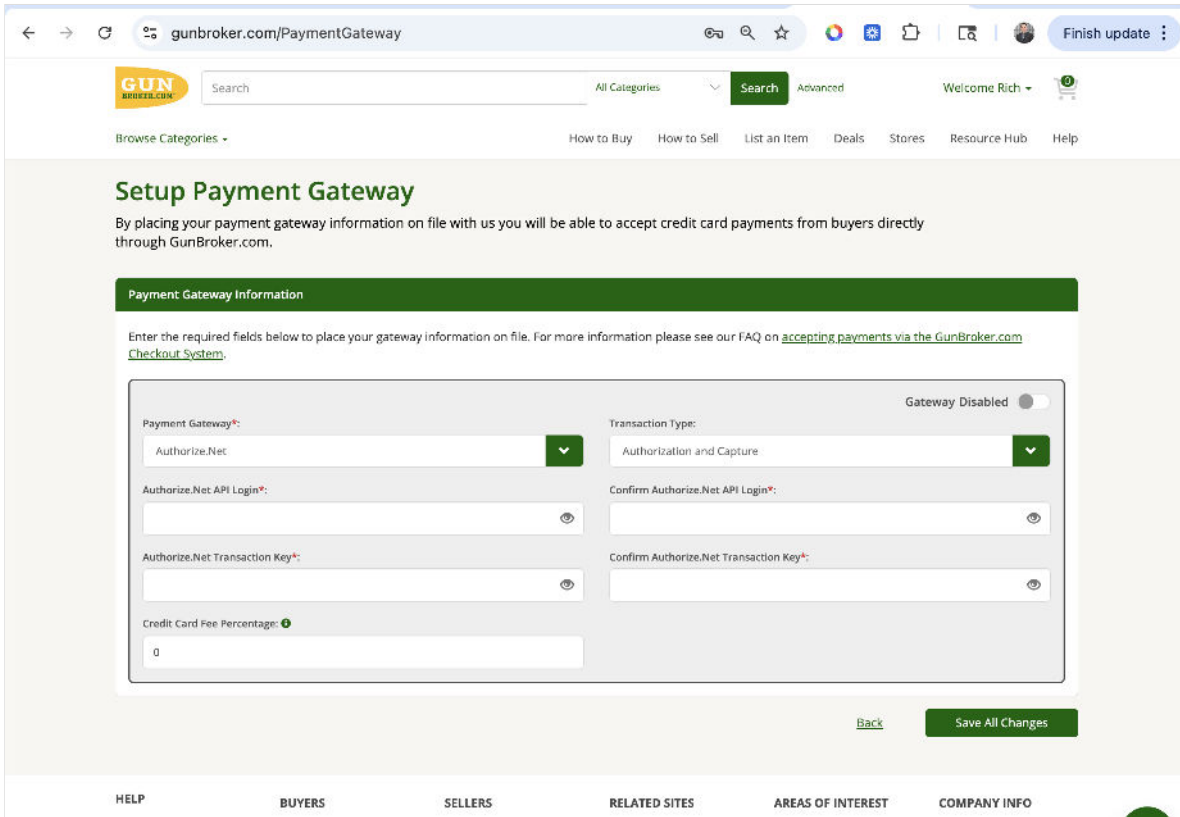

Step 3 — Enter Your Authorize.net Credentials

On the Setup Payment Gateway page, fill in the fields using the credentials from your TacticalPay welcome email:

- a. **Payment Gateway:** select *Authorize.Net* from the dropdown.
- b. **Transaction Type:** select *Authorization and Capture*.
- c. **Authorize.Net API Login:** enter the API Login ID from your welcome email (and confirm it in the field to the right).
- d. **Authorize.Net Transaction Key:** enter the Transaction Key from your welcome email (and confirm it).
- e. **Credit Card Fee Percentage:** leave at 0 unless your account is set up for Cash Discount.

Then toggle **Gateway Disabled** → **Gateway Enabled** in the upper-right of the form, and click **Save All Changes**.

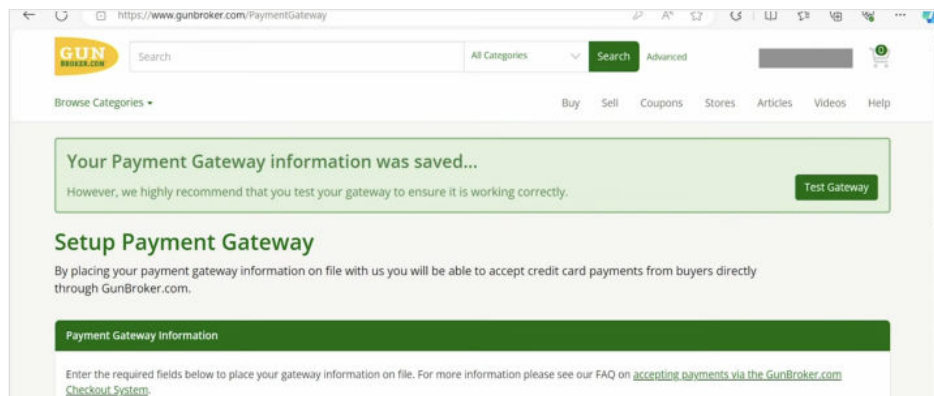

Note: Want to enable Cash Discount so your customers cover credit card processing fees instead of you? Contact support@tacticalpay.com and we'll get it configured on your account.

Setup Payment Gateway — fields populated from your TacticalPay welcome email

Step 4 — Confirm the Gateway Saved

You'll see a green confirmation banner at the top of the page once your credentials save successfully.

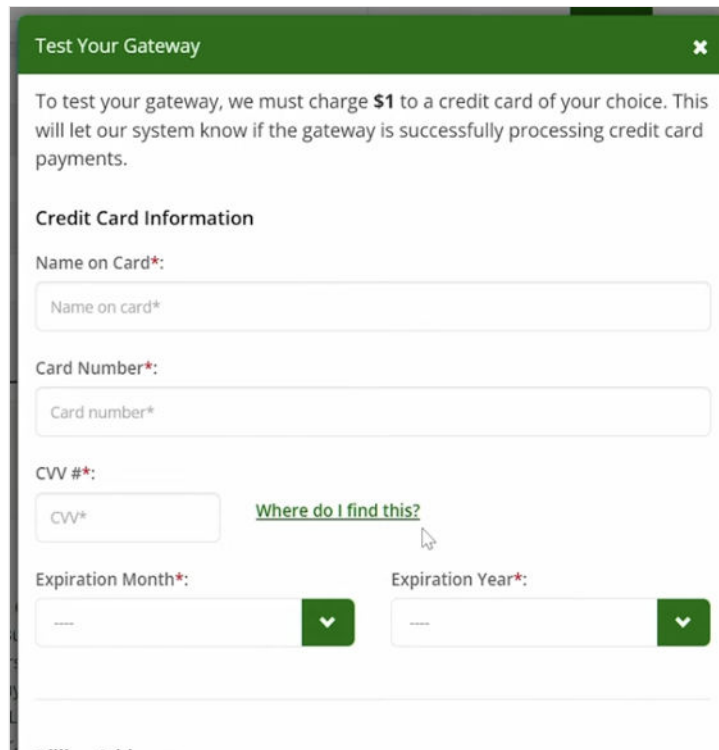

Confirmation — your Payment Gateway information was saved

Step 5 — Test the Gateway

GunBroker lets you confirm the integration is working by running a \$1.00 test charge through your gateway. Based on the response from Authorize.net, GunBroker will tell you whether the charge was approved or declined.

Scroll to the bottom of the Payment Gateway Information page and click **Test Gateway**. Enter a real credit card in the dialog that appears — GunBroker will run a \$1.00 charge through Authorize.net and report whether it was approved or declined.

Test Your Gateway dialog — \$1.00 is charged to confirm the integration is live

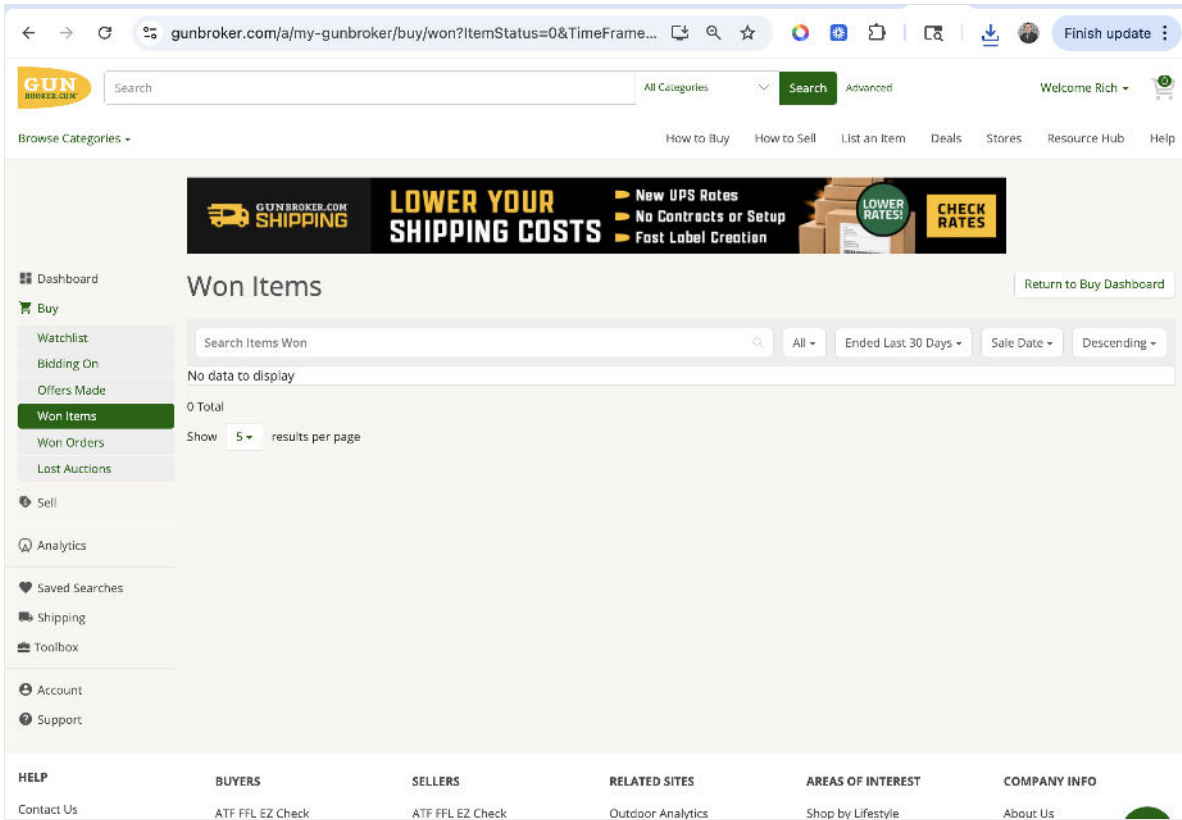

Tip: If the test charge is declined or returns an error, double-check the API Login ID and Transaction Key you entered against your welcome email — these are the most common causes. If the values look right and the test still fails, contact TacticalPay support and we'll work with you to troubleshoot.

How Customers Will Pay You

Once your gateway is enabled, items eligible for Immediate Checkout are displayed with the dollar-sign icon on GunBroker. Buyers can submit payment, shipping, and FFL information through GunBroker Checkout as soon as the listing ends — funds are processed through your Authorize.net gateway and deposited per your TacticalPay merchant account schedule.

Buyers can reach GunBroker Checkout in three ways:

1. From **Welcome > Buying > You Won!**, click **Select**, then **Proceed to Checkout**.
2. On the View Item page, click the **Checkout** link above the "This Item has been Sold" message.
3. From the "You Purchased an Item" email notification, click the **Proceed to Checkout** link.
